Hands-on Training in Basic Skills in Molecular Biology – BATCH I

The Department of Microbiology organised workshop on “Hands-on Training in Basic Skills in Molecular Biology” in association with Centre for Molecular Diagnostics and Research, SPPU from 3 to 8 June, 2024. Dr. Karishma Pardesi, Head, Department of Microbiology, and Nodal Officer, CMDR, SPPU and Dr Ekta Kamble, Assistant Professor (Contractual) were coordinators of the workshop.

The workshop was conducted in two modules each lasting three days. Twelve participants registered for the workshop most of who belonged to undergraduate Microbiology or Biotechnology classes.

A second workshop on the same modules has been organised form 18 to 22 June, 2024. Follow the link to register:

Feedbacks by the participants:

“The course is way much more than my expectations. I am really enjoying a lot. There's nothing that I can rant about. Thankyou SPPU for giving us this opportunity and making my future resume a lot better!”

- Sampada Diwakar

“This module was Full of Knowledge, and Practical Skills”

- Sara Bhosale

“The overall experience was amazing and very engaging, the instructions provided, the practical done everything was very good and I am satisfied with everything. Ekta ma'am was extremely helpful and good at teaching all the material. I hope such workshops are organised more often. It was a wonderful and knowledgeable experience.”

- Gargi Joshi

“As an undergraduate microbiology student, I got to know about so many new topics and about various machinery. It completely exceeded our expectations and will definitely benefit in our future. It was a very engaging and informative workshop.”

- Manaswi Dandekar

“Increased our efficiency in handling lab equipment and learn various mechanisms of plasmid isolation, digestion and now cloning. Enjoyed and learnt many new and interesting techniques and things about various Molecular and Microbial Biotechnology as we wished and expected to learn about! Thanks to our trainer, Ekta Ma'am! She engaged with us very well and did not make us feel left out for even a second.”

- Saylee Kelkar

“The experience was great. I learnt lot of new things. When it comes to basic skills in Molecular Techniques, it is important to focus on the sensitivity of the techniques. And I really felt happy after getting good results. The guidance we received was great.”

- Falguni Pawar

“Got a very good idea as to how PCR works & on process of cloning.”

- Riya Kanade
